

Heathcoat Fabrics Limited are knitters, weavers, dyers and finishers of a wide range of technical textiles.

Our spacetec[®] three dimensional fabric offers a huge range of multifunctional benefits for a variety of market applications. spacetec[®] fabrics can be found in many market sectors including furniture, automotive, activewear, healthcare and military. Through its unique manufacturing process many different properties can be incorporated and as a one-piece structure it can give additional advantages over traditional foams and multi-layer fabrics.

Benefits of spacetec[®] fabric

- **Comfort** – Cushioning and shock absorbing with excellent recovery.
- **Airflow** – 3D construction reduces heat build up and allows air circulation.
- **Washable** – Machine washable, will not de-laminate or breakdown.
- **Versatile** – Different constructions offer different thickness, compression characteristics and yarn combinations.
- **Flame retardant** – Many spacetec[®] fabrics meet or exceed BSEN1021.
- **Dyeable** – spacetec[®] fabric is dyeable and specialist finishes can be applied e.g. anti-bacterial.
- **Mouldable** – can be heat moulded and shaped.
- **Recyclable** – Manufactured under ISO14001 conditions spacetec[®] fabrics are suitable for recycling.
